

Evaluate your business partners from due diligence point of view

How for Anti-Money Laundering and (AML) and Anti Bribery and Corruption (ABC) checks can drive a business decision

Processes followed to evaluate and better understand the overall profile of a company can be very complex and also related to local legislation. If a business partner is acting at global level, required checks are involving multiple sources and aspects.

Starting from checks related to company performance, firmographic data, negative events, management and so on, it's becoming more and more important know in advance if there is an involvement in criminal activities or financial fraud in order to avoid legal issues and reputation damage. Of course, in order to obtain an overall picture, it's necessary not only get information related to company but also ones related to management and shareholders. Only proceeding in this way is possible to obtain an exhaustive picture of the subject.

Discussing about Anti-Money Laundering (AML) and AntiBribery and Corruption it's necessary to consider two different topics. First of legal aspects, then data content.

Risks connected to money laundering, fraud, corruption, bribery or other criminal activities are more and more present in the worldwide market. For this reason, at the same time, government requirements to implement appropriate actions to comply with regulations have been established all over the world.

Nowadays, companies must be able to check business partners, not just for evaluation purposes, but also for due diligence processes and need solutions to screen information required by regulatory processes.

Even if Anti-Money and Anti-Bribery and Corruption can be connected as criminal practices, definitions are different and area of interest too.

Starting with Anti-Money Laundering (AML), considered as laws, regulations and procedures having the aim to prevent criminals to 'clean' funds obtained against law transforming into a legitimate profits. Even if Anti-Money Laundering legislation covers a limited number of transactions and criminal activities, implications are very important in term of rules to follow. For example, banks and financial institutions have to put in place specific procedures when a deposit account has to be opened to ensure no money laundering is in progress.

How for Anti-Money Laundering and (AML) and Anti Bribery and Corruption (ABC) checks can drive a business decision

Money-Laundering crime can be summarized in three different stages: placement, layering and integration.

- Placement: it's movement of cash from its source and sometimes can be easily discovered. It's based on the circulation of illegal money through financial institutions, shops, casinos, bureau the change etc. both domestic or abroad. This process can be done different paths. First of all from smuggling, as illegal movement of currency or other monetary instruments out of a country. Then, when a bank is controlled by criminals linked for example to drugs dealers. In this case a complete liberalization of financial sector can help laundering. Another important point is the liberalizations of foreign exchanges giving laundering an important boost. Also brokers and constitutions of big funds can support this system with funds itself in which original sources cannot be tracked. Classical method in money laundering is the purchase of assets with cash: from illegal money to valuable goods.

- Layering: the purpose of this stage is make difficult detect a laundering activity and methods are first of all cash conversion into monetary instruments. Then, material assets bought with illicit funds and the sold both locally or abroad. In this case is quite difficult to trace the origin of the money.

- Integration: money previously laundered is now available through normal banking systems as 'normal' earnings coming from businesses. Differently from layering, in the integration processes, detection and identification of laundered funds is done by informants. Methods are sales of property to integrate laundered money back into the economy using shell companies

so the sales would be considered legitimate. Also 'front companies' and false loans are used by criminals for apparently legitimate transactions. Complicity of foreign banks represents an high level of sophistication, showing very often a protection. Release false Import/Export invoices is a very effective method in integrating illicit proceeds back to the economy.

It's very important to take into account:

- Criminals use money laundering to hide their crimes and connected money
- Anti-Money Laundering regulations is committed fight criminals in hide illicit money
- Anti-Money Laundering regulations require financial institutions to monitor customers transactions and report suspicious financial activities

Moving to Anti-Bribery and Corruption, can happen anywhere in a company but it's more evident where business is also overseas and there is an interaction with government. It means that operate globally expose at the same time to new opportunities and risks. US Foreign Corrupt Practices Act (FCPA) and UK Bribery Act set the general parameters in defining bribery and corruption around the world.

These acts are defining the guidelines for how to identify, avoid, report and prevent bribery and corruption, how they must be reported, awareness. This is very important for the organizations as a lack in these practices can cause reputation damages, unwanted media attention and consequent lack in trust with potential decrease in economic results. Only clear policies in bribery and corruptions can help in proceeding transparently.

Bribery and corruption have two different definitions even if are representing a very similar crime.

How for Anti-Money Laundering and (AML) and Anti Bribery and Corruption (ABC) checks can drive a business decision

- Bribery: as the offering, giving, receiving, or soliciting of any item of value to influence the actions of an official, or other person, in charge of a public or legal duty.

-Corruption: is more generic and can be considered as the abuse of entrusted power for a private gain.

Operating in a global market the risk of being victim of bribery and corruption exists. This is why every time a relationship with a business partner is in place is required to have in place a robust due diligence flow in order to avoid such risks.

Main Anti-bribery and anti-corruption acts and regulations are:

- Organization for Economic Co-operation and Development (OECD) Anti-Bribery and Corruption
- Foreign Corrupt Practices Act (FCPA)
- United Kingdom (UK) Bribery Act
- Modern Slavery Act, UK
- United Nations Convention against Corruption

In this scenario, where Money Laundering and Bribery and Corruption can represent a risk for company and organizations both in term of legal proceedings and reputational damages with consequent economic losses, it's mandatory be able to count in information useful to performs checks on business partners.
